Introduction

All users requesting services of the Open Science Grid must abide by a common set of basic rules. This document lists those basic rules. Details of processes enforcing these rules are documented separately.

Users Agreement

- (1) You may only perform work and store data consistent with the charters of the organizations of which you are a member, and only on resources authorized for use by those organizations.

- (2) You will not attempt to circumvent administrative and security controls on the use of resources. If you are informed that some aspect of your grid usage is creating a problem, you will adjust your usage and investigate ways to resolve the complaint. You will immediately report any suspected compromise of your grid credentials (security@opensciencegrid.org) or suspected misuse of grid resources (abuse@opensciencegrid.org).

- (3) Resource providers have the right to regulate access as they deem necessary for either operational or security-related reasons. Examples may include regulation based on VO, IP address, submitter, job type, or other relevant characteristic. Resource providers will endeavor to make minimal restrictions sufficient to accomplish the desired regulation.
